

Software Quality & Test Engineer (m/f)

The COBI Software Team is seeking a dynamic team player to ensure product and quality control at COBI is up to standard and to support us in finding ways to enhance efficiency and results of our testing routines.

The ideal candidate will have a great passion for COBI and for biking and execute all activities with respect to the COBI brand strategy. Position is located in Frankfurt/Main, Germany.

Primary Responsibilities:

- Participate in the planning process for new features and initiatives.
- Create and execute API and feature-level test plans – on and off the bike.
- Contribute to the existing test automation efforts.
- Instruct external testers how to perform test cases and document results.
- Investigate, log, track, and triage bugs to determine root cause and establish prioritization.
- Track inventory of test devices including bikes, e-bikes, smartphones and hubs.
- Organize and coordinate test efforts across different testing groups.
- Establish new or modified testing workflows and techniques to improve testing efficiency and outcome.

Requirements:

- Must be motivated, organized, and able to communicate effectively and handle several tasks at one time.
- Must be skilled at producing accurate and punctual reports & delivering presentations/training.
- Must have the ability to communicate complicated or difficult information clearly and diplomatically. with all levels of employees; written and verbal communications must be polished and diplomatic.
- Must have ability to adapt to change and be open to new ideas and taking on new responsibilities.
- Must be adept at handling pressure and uncertainty and adjusting work plans to meet changing company/department needs.
- Experience testing applications on Mac, iOS, Android and/or Embedded systems.
- Excellent analytical and troubleshooting skills.
- Excellent verbal/written communication skills in German and English
