

Mobile App Developer (iOS) (f/m)

The COBI.bike Software Development Team is looking for an iOS Developer with a track record of developing high-quality mobile apps. You'll work closely with our UX, mobile and backend engineers to deliver a great app experience across our entire product line.

What connects us is a passion for cycling, digital technology, and excellent design as well as the desire to try out new things and always question the status quo. We want to make a difference and put ourselves at the forefront of a new movement.

COBI.bike has established a brand new market segment, of which we are the leader. Our partners value this and want to take advantage of this. All of our marketing activities are aimed at making COBI.bike touchable and tangible. We scrutinize every action to ensure that it delivers the COBI.bike experience – whether by trying it out, listening to experiences from others or from a trusted partner. The user, rather than technology, is our key priority. Recently acquired by Bosch eBike Systems, our technical know-how will be combined with Bosch's global market share.

This is a critical role in a fast-paced organization and requires a high-energy person that can operate in a dynamic environment. The ideal candidate will have a great passion for COBI.bike and execute all activities with respect to the COBI.bike brand strategy. The position is located in Frankfurt/Main Germany.

Responsibilities:

- Design and build advanced app functionalities for the iOS platform
- Write test code to ensure robustness, improve usability and performance
- Collaborate with cross-functional teams to define, design and ship new features that cyclists love
- Continuously discover, evaluate and implement new technologies to maximize development and testing efficiency
- Participate in maintaining test and development tools on iOS and Mac platforms

Requirements:

- 3+ years of software development experience
- 2+ years of iOS development
- Have published one or more iOS apps in the App Store
- In depth familiarity with Swift, Objective-C and Cocoa Touch
- Shares our passion for writing clean, readable and testable code
- Experience working with iOS frameworks such as Core Animation, UIKit, XCTest
- Experience with profiling iOS apps to optimize CPU, memory and networking performance
- Experience with Bluetooth and/or location technologies is a plus
- Working knowledge of the general mobile landscape, architectures, trends and emerging technologies
- Solid understanding of the full mobile development life cycle
- Agile and flexible working culture

If you do awesome work and are awesome to work with, please find out more about us on www.cobi.bike and get in touch with Jana Wardag (jobs@cobi.bike).
