

Software Project Manager (f/m)

COBI.bike is seeking a Software Project Manager (f/m). If you have a strong amount of experience in Software Project Management, and you have solid skills working with different development methodologies, please read on!

Your main objective will be to plan, control, and organize software project resources to complete ongoing and special projects. This is a critical position within our organization. You will work with stakeholders to understand system processes and create and enhance process flow.

What connects us is a passion for cycling, digital technology, and excellent design as well as the desire to try out new things and always question the status quo. We want to make a difference and put ourselves at the forefront of a new movement.

COBI.bike has established a brand new market segment, of which we are the leader. Our partners value this and want to take advantage of this. All of our marketing activities are aimed at making COBI.bike touchable and tangible. We scrutinize every action to ensure that it delivers the COBI.bike experience – whether by trying it out, listening to experiences from others or from a trusted partner. The user, rather than technology, is our key priority. Recently acquired by Bosch eBike Systems, our technical know-how will be combined with Bosch's global market share.

This is a critical role in a fast-paced, entrepreneurial organization and requires a high-energy person that can operate in a dynamic environment. The ideal candidate will have a great passion for COBI.bike and execute all activities with respect to the COBI.bike brand strategy. The position is located in Frankfurt/Main Germany.

Responsibilities

- Develop and maintain software applications, integration strategies and oversee development initiatives.
- Responsible for managing the support of existing and new product development in the environments and the deployment of software systems and components.
- Oversee installation and configuration of software and related infrastructures.
- Ability to communicate complex business concepts and work directly with developers to implement software solutions.
- Manage Development Operations team members, tasks and schedule.
- Own overall project plan and manage cross-functional and distributed resources, ensuring on-time delivery, meeting of budgetary demands, and achievement of business goals.
- Use formal processes and tools to manage resources, timelines budgets, risks, and changes.
- Create and maintain process workflow documents to support business needs.
- Act as primary point of contact for project status; manage project communications and information in the form of formal stakeholder briefings, project update meetings, and written, electronic, and graphic reports.

Requirements

- Bachelor's degree in business, marketing, operations or related field.
- 3-5 years of experience working in project management.
- Software platform/operating system deployment
- Experience with agile project management methods
- German must/ English fluent
- Extensive problem-solving skills
